

Wound Care Equipment and Supplies Policy and
Wound Care Equipment and Supplies Order Form (F00164)

Policy Revision Comments

The 14-day comment period for the Wound Care Equipment and Supplies policy and the Wound Care Equipment and Supplies Order Form (F00164) ended January 29, 2018. HHSC solicited and received one comment on proposed revisions to the policy from a stakeholder. The comment relating to the proposed policy changes and HHSC response follows.

Comment: A commenter recommends modification to the proposed Wound Care Equipment and Supplies form. On page 3 of 4, in the middle of the form it states:

Drainage Amount:

☐ Sereos ☐ Sanguineous ☐ Serosanguineous ☐ Purulent

The commenter recommends a change to Drainage “Type” instead of “Amount”.

Response: HHSC agrees to make the suggested change to the Wound Care Equipment and Supplies Form. The listed items are properly categorized as drainage types, not amounts. In addition, HHSC will correct typographical errors found on the form in order to reflect proper medical terminology.
